

# Research integrity and a future research culture

**Dr Joanna Dally**  
Head of Policy, Research

**Dr Frances Downey**  
Senior Policy Advisor

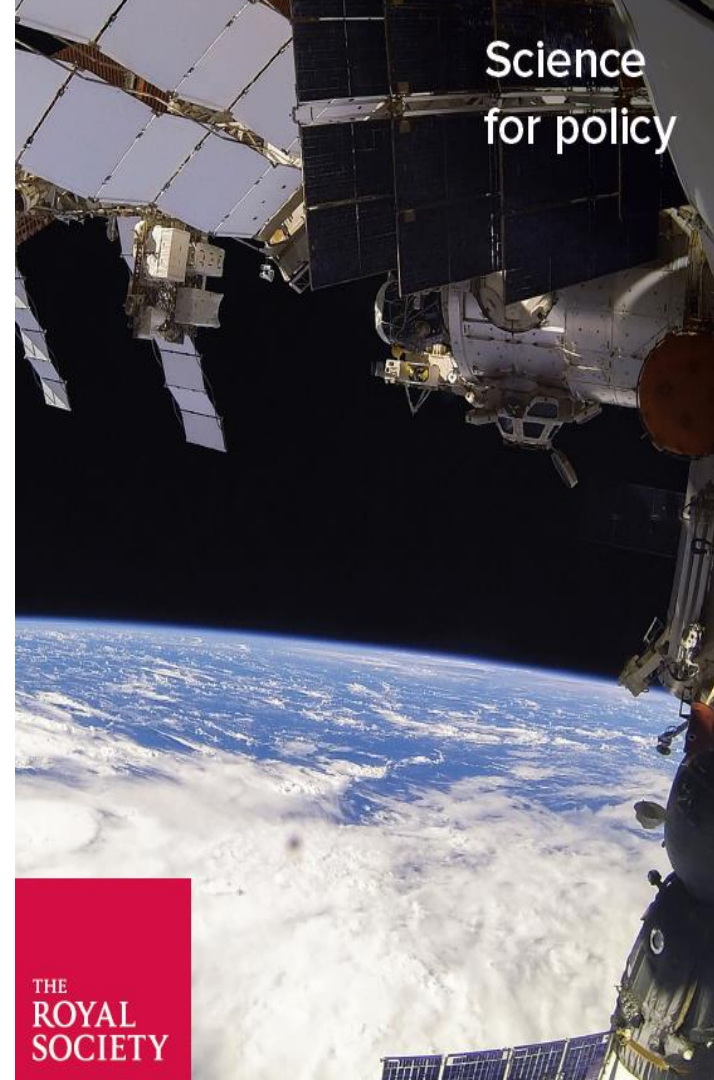

## The Royal Society and Science Policy

- Science policy since **1662**.
- **Providing scientific advice for policy** is a priority in the Society's strategic plan.
- A part of the Society's **core mission**. Science and policy interweave and inform all that we do.
- We inform dialogue and action around the world.  
**Science is a global endeavour.**

## Why do science policy?

- To create scientific insights that inform policies and decisions that change the world.
- To provide evidence to government(s) and parliament to help them make robust decisions.
- To enable science and technology to bring the greatest possible benefits to society.
- To create the environment for excellent science.

## Research Environment

- Assessment
- Evaluation
- Practice
- Integrity

**What tools and practices can we build on  
to respond to a changing landscape?**

**Where are there other tensions within the system,  
both perceived and real? How can we overcome  
these?**

**What do you think the role of the Royal Society  
should be in promoting and embedding integrity in  
the research system?**
