Review of annual statements on research integrity

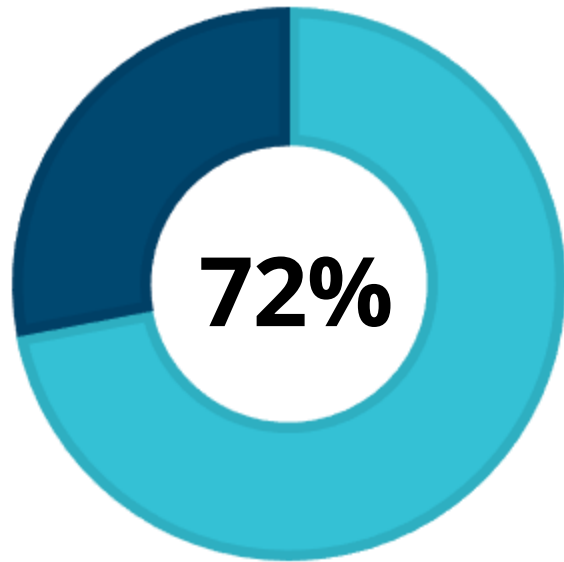

An overview of research integrity activity and good practice at higher education institutions in the United Kingdom

Commissioned by
**The UK Committee for
Research Integrity and the
Research Integrity Concordat
Signatories Group**

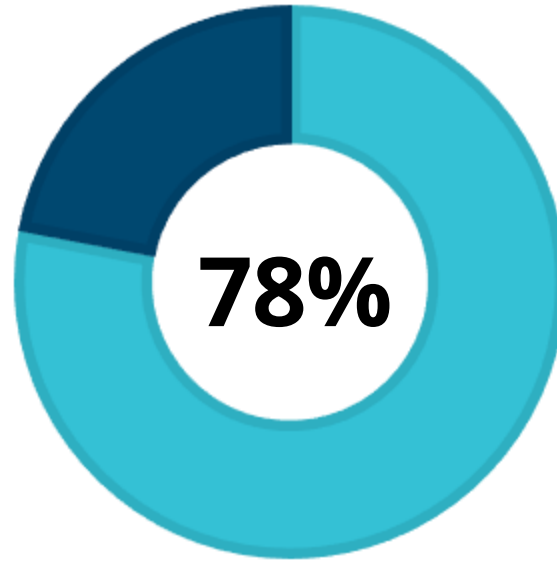

A background image of a wooden bookshelf filled with various books. The books have different colored spines, including blue, green, and red. There are decorative labels on the shelves, one with the letter 'D' and another with 'E'. The bookshelf is partially obscured by a large, dark blue triangular graphic on the right side of the page.

<https://ukcori.org/our-work/analysis-of-research-integrity-annual-statements/>

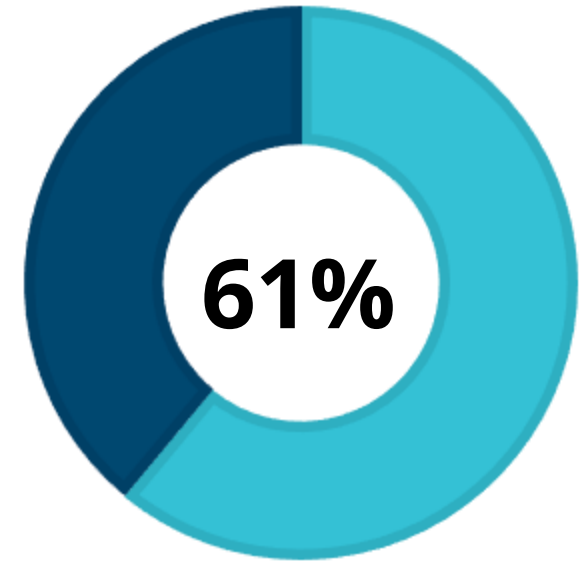

Final dataset: 283 annual statements by 117 institutions

**of annual statements
by in-scope institutions
available for 2019/20**
92 annual statements
discoverable online and
5 obtained via email

**of annual statements
by in-scope institutions
available for 2020/21**
96 annual statements
discoverable online and
8 obtained via email

**of annual statements
by in-scope institutions
available for 2021/22**
76 annual statements
discoverable online and
6 obtained via email

Key findings

1. Annual statements describe diverse activities in different institutional contexts
2. Annual statements show evidence of institutions learning from investigations
3. Research integrity is part of broader discussion around research culture
4. Support and training on research integrity are focused on early career stages
5. The effectiveness of research integrity activities is not formally monitored
