UKRIO Stakeholder Forum

James Parry, Chief Executive, UKRIO

- **UK research is high quality and ethical but more must be done to safeguard this…**

- Revise *the Concordat to Support Research Integrity*

- UKRI to explore pressures within UK research culture

House of Commons

Science and Technology Committee

Research integrity

Sixth Report of Session 2017–19

- Create a national oversight committee for investigations of alleged research misconduct

- Problems with clinical trial reporting and transparency

- Concordat being revised following S&T Cte. report

- UKRIO helping the Signatories Group with the revision

- New version: mid 2018?

- UKRIO will:

  - Revise our Self-Assessment Tool

  - Complete work programmes that have been paused while the Concordat was being revised

The concordat to support research integrity

Universities UK

- Revised misconduct investigation procedure

- Revised Code of Practice for Research

- Annual institutional research integrity statements

- Detailed guidance on establishing research integrity 'Champions' and 'Advisers' in your institution

- Improving clinical trials transparency and reporting

- **Publications will be supported by other materials, e.g. slides, webcasts**

- Designing/ delivering **research integrity training courses**

- **Case studies/ scenarios**

- **Specialist training**, e.g. research ethics committee members

- ***What other types of training would be useful?***

- **Research integrity training toolkit** & supporting resources

- **Online training module** for UKRIO subscribers

- **Research culture:** *Integrity in Practice* and ongoing work

- ***What other support on research culture would you like to see?***

- **Collaborative work**

  - ARMA-UKRIO guidance for research ethics committees

  - Informing the work of the Concordat stakeholders as their guidance and requirements evolve

  - Exploring how we can support the work of UKRI

  - Funding the UK Reproducibility Network

- **'The Relevance Project'**

  - How is research integrity perceived in certain disciplines?

  - What support is most relevant? What is less relevant?

  - UKRIO will hold workshops covering disciplines where research integrity can be seen as underserved, e.g the arts and humanities, mathematics and computing, the physical sciences.

Discussion

- What support do you need from UKRIO?

- What topics should future publications cover?

- What do you need from us in relation to:

  - The revised Concordat?

  - The new Oversight Committee?

  - Research culture?

  - Clinical trials transparency and reporting?

- **What additional support can we provide?**
