## Failed initial pipe message error

Dispatch learners who are unable to launch the course via their learning management system (LMS) may experience the “**Failed to receive initial pipe message from dispatch driver**” error which looks like this:

This error is displayed to new learners who are trying to enrol when:

- the registration cap is reached
- the registration is closed

Existing learners already enrolled can launch the course but new registrations cannot.

Increasing the registration cap or opening the registration will resolve the issue.

For additional information, see the following links:

- <https://support.scorm.com/hc/en-us/articles/360026041193-Dispatch-Failed-to-Receive-Initial-Pipe-Message-Error>
- <https://support.scorm.com/hc/en-us/articles/206164186-Requirements-to-successfully-deploy-your-Dispatch-file-from-a-Client-LMS>

## Missing Key-Pair message error

Dispatch learners who are unable to launch the course via their LMS may experience the “**MissingKeyMissing Key-Pair-Id query parameter or cookie value**” error which looks like this:

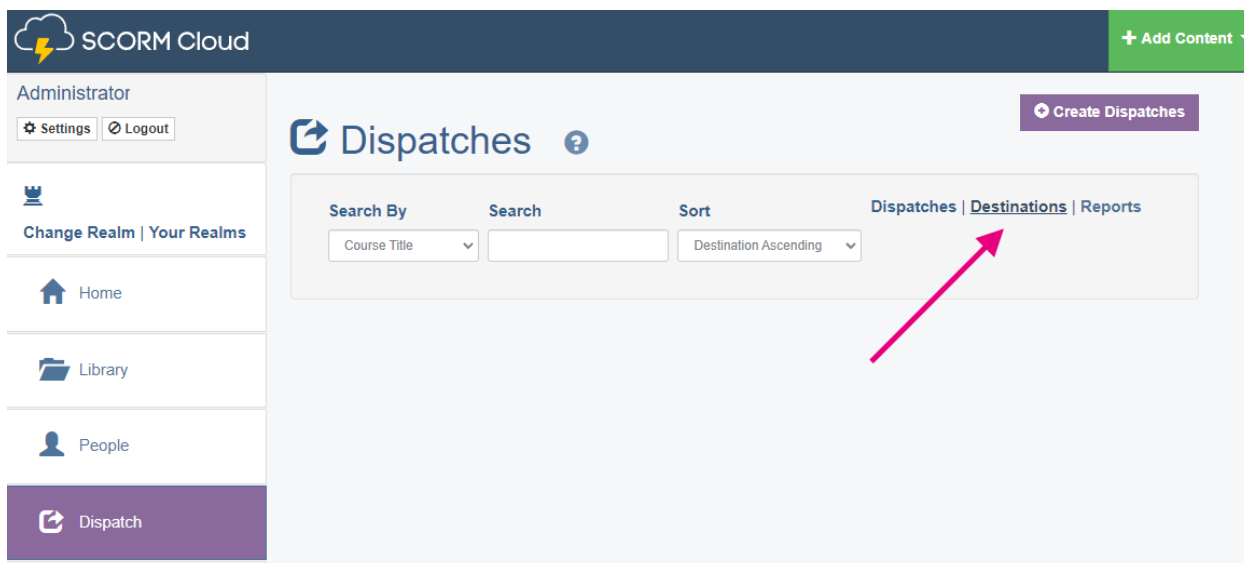

This is an authentication error caused by the use of cookies by SCORM Cloud to determine if a learner is authorised to view course content.

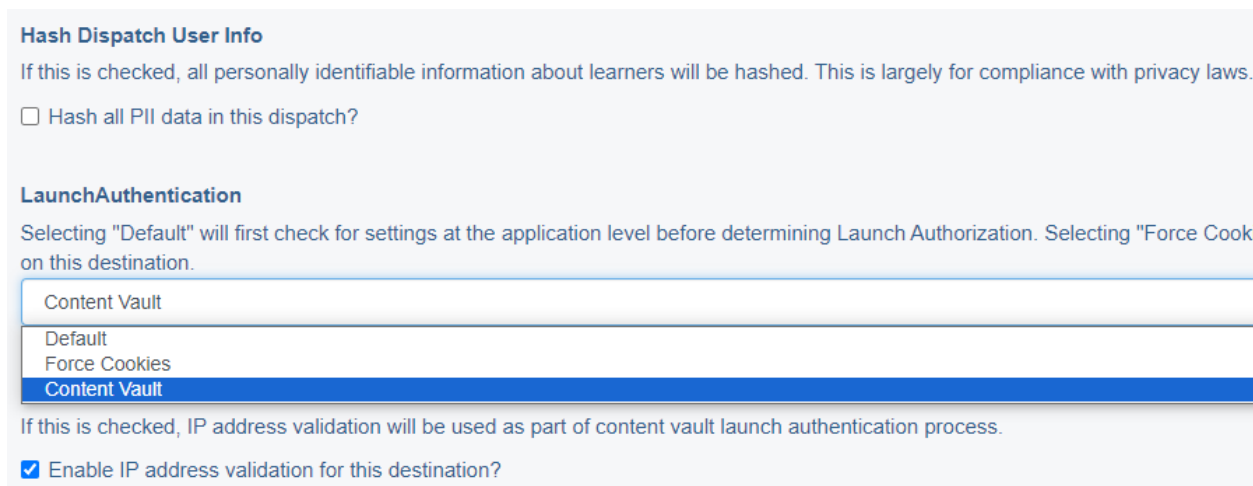

To resolve this issue, change the launch authentication to ‘**Content Vault**’ at the ‘**Destination**’ level. Content Vault uses the learner’s IP address rather than a third party cookie to authenticate the launch.

## Changing the launch behaviour:

In SCORM Cloud, click on **'Dispatch'** in the main navigation panel and then click on **'Destinations'** (pink arrow):

In the 'Destinations' window, click on **'Edit'**, then in the following window, select **'Content Vault'** from the drop-down menu under **'LaunchAuthentication'**.

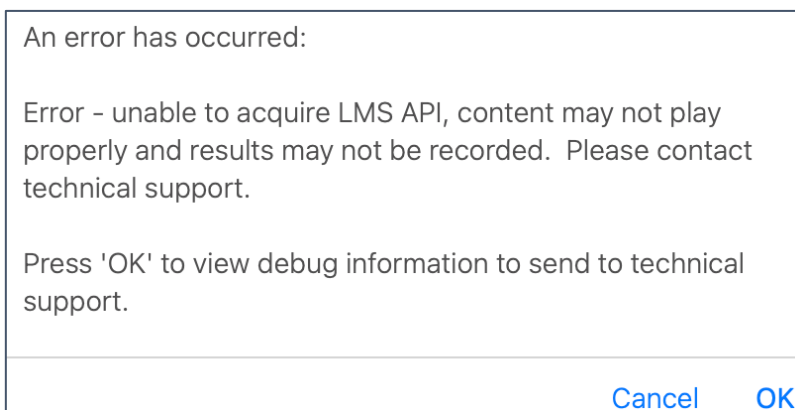

For additional information, see the following link:

- <https://support.scorm.com/hc/en-us/articles/360042728333-Cookieless-Content-Authorization-in-SCORM-Cloud-Content-Vault>

## Unable to acquire LMS API message error

Dispatch learners who are unable to launch the course via their LMS may experience the “**Error – unable to acquire LMS API**” error which looks like this:

On the LMS side, changing the launch behaviour to “SCO Launch Type = Frameset” and “Player Launch Type = Frameset” will cause issues with the certificate. The best and easiest option to resolve this is to configure the launch behaviour to ‘Content Vault’ in SCORM Cloud as explained above.

## Browser support

The following browsers are supported:

- Edge
- Safari
- Chrome
- Firefox

Additional configuration may be required by the end-user browser settings, including:

- Allowing pop-up windows
- Add SCORM Cloud domain as a trusted site
- Accept third party cookies

## Reporting Dashboard

By default, the reporting data on registrations and completion rates are only shown for the last 30 days. The dashboard link for course administrators is configured to show the full calendar year. A new dashboard link must be provided for each calendar year.

Promoting integrity and high ethical standards in research  
Providing confidential, independent and expert support

The UK Research Integrity Office (UKRIO) is an independent charity, offering support to the public, researchers and organisations to further good practice in academic, scientific and medical research. We pursue these aims through a multi-faceted approach:

- Education via our guidance publications on research practice, training activities and comprehensive events programme.
- Sharing best practice within the community by facilitating discussions about key issues, informing national and international initiatives, and working to improve research culture.
- Giving confidential expert guidance in response to requests for assistance.

Established in 2006, UKRIO is the UK's most experienced research integrity organisation and provides independent, expert and confidential support across all disciplines of research, from the arts and humanities to the life sciences. We cover all research sectors: higher education, the NHS, private sector organisations and charities. No other organisation in the UK has comparable expertise in providing such support in the field of research integrity.

UKRIO welcomes enquiries on any issues relating to the conduct of research, whether promoting good research practice, seeking help with a particular research project, responding to allegations of fraud and misconduct, or improving research culture and systems.
